

As Readers and Writers, we will...

- read a class story about a magic mirror that change worlds!
- investigate the characters and setting through drama and writing from points of view.
- look at writing poems, playscripts and explanations.
- look at stories and use them to create our own drama based on the story.

As geographers and historians, we will...

- look at local fayres, festivals and fetes and how that has affected the local area.
- learn about wool production and how we use materials that have come from animals.

As scientists, we will...

- looking at light and how we see light, including reflections and mirrors.
- we will also look at forces later in the term, such as gravity and the use of magnets and how they work.

Fayres and Festivals

As Artists and Designers, we will...

- sketch out designs for kaleidoscopes
- making our own kaleidoscopes
- look at local areas with maps.

As Mathematicians, we will...

- looking at 2D and 3D shapes and their properties. from starting to tell the time from analogue and digital clocks.
- solve problems involving measures of time.
- start looking at fractions and identifying that a fraction is a part of a whole and applying to problems.
