

Steps through Learning

Computing: Communicating Effectively Online

Vocabulary that I will learn and use during this unit of work

System - a computer system is made up of different parts, each with a special job

Connection - a link joining multiple parts of a system together

Protocol - a set of rules that are an agreed way of doing something which computers use to communicate

I.P address - Internet Protocol address identifies a specific computer

DNS - Domain Name Server is a computer that works like an address book, matching IP address to the domains

Data packet - how information is sent between computers

Header - the address of the data packet

Data Payload - the information that is with the header

Refine - to become more specific

Communication - how people connect and talk to each other

Public - something in open view that many people can see

Private - something involving a particular person or group only

Algorithm - a set of instructions for a computer to follow to carry out an action

Search engine optimisation (SEO) - a way to make

nationalexpress.com	149.126.72.191
nationalgallery.org.uk	195.195.116.1
nationalrail.co.uk	104.18.31.81
nationaltheatre.org.uk	18.66.248.10
Nationaltrust.org.uk	52.210.108.135
nominet.org.uk	162.159.134.42

Public

Something in open view

Private

Involving a particular person or group only

Is there an age limit?
