

My steps through learning:

What I will know and understand

How I will show that I know it

Computing - Exploring the Digital Universe

Steps through Learning

Lesson 5

To know the content of the World Wide Web is created by people

I can recognise who owns the content on websites and understand what I can and can not share

Lesson 6

To know that not everything on the internet is true, honest or accurate

I can review images and decide whether or not they are real

Lesson 3

To know some types of media that can be shared via the World Wide Web

I can describe how to access websites on the World Wide Web

Lesson 4

To know the key parts of a website

I can consider what is needed to create my own content online

Lesson 1

To know some of the devices used to connect one network with another network

I can demonstrate how information is shared across the internet

Lesson 2

To know the different parts of a network

I can explain that the World Wide Web contains websites and web pages

What should I already know:

- . A basic knowledge of what the internet is used for
- . An awareness of e-safety

National Curriculum:

- Understand computer networks including the Internet; how they can provide multiple services, such as the worldwide web; and the opportunities they offer for communication and collaboration
- Use search technologies effectively, appreciate how results are selected and ranked, and be discerning in evaluating digital content
- Select, use and combine a variety of software
- Use technology safely, respectfully and responsibly; identify ways to report concerns about content and contact
