

My steps through learning:

What I will know and understand

How I will show that I know it

Computing - Media Masterclass

Steps through Learning

Lesson 5

To know what makes an image look real or not real

I can choose a suitable image and edit it to create my own project

Lesson 6

To know that changes can improve an image

I can review an image, give feedback and make relevant

Lesson 4

To know that images can be combined

I can copy and paste an image to produce a combined image

Lesson 3

To know the impact of cloning to change the composition of a photo

I can add and remove parts of an image using the cloning tool

Lesson 2

To know that colours can be changed in digital images

I can experiment with different colour effects

Lesson 1

To know that digital images can be changed

I can improve an image by rotating and cropping it

What should I already know:

- . How to use an i-pad to take a photograph
- . Understand the terms 'portrait' and 'landscape'
- . An awareness of e-safety

National Curriculum:

- Use sequence, selection and repetition in programs; work with variables and various forms of input and outputs
- Select, use and combine a variety of software on a range of digital devices to design and create a range programs, systems and content that accomplish given goals, including collecting, analysing, evaluating and presenting data and information
