

My steps through learning:

What I will know and understand

How I will show that I know it

Geography - In the Desert

Steps through Learning

Lesson 5

To know some of the challenges faced by people living in deserts

I can explore how large desert cities get the water they need

Lesson 6

To know some causes and effects of desertification

I can create a poster about the effects of desertification for farmers

Lesson 3

To know about desert formations

I can describe the process of erosion to create formations such as sand dunes, salt flats, pillars and arches

Lesson 4

To know some ways in which deserts are used by humans

I can explain how humans use the desert for filming, leisure and military testing

Lesson 1

To know what deserts are and where in the world they are located

I can use a world map to identify the major deserts of the world

Lesson 2

To know the weather and climate of some deserts

I can use graphs and charts to find, present and interpret information

What should I already know:

- Five oceans of the world
- Seven continents of the world
- Know where the UK is on a world map
- Name the four countries that make up the united kingdom
- A desert is a habitat

National Curriculum:

- Locate the world's countries, using maps to focus on Europe and North and South America, concentrating on their environmental regions, key physical and human characteristics, countries and major cities
- Physical geography, including: climate zones, biomes and vegetation belts, rivers, mountains, volcanoes and earthquakes and the water cycle
- Use maps, atlases, globes and digital/computer mapping to locate countries and describe features studied
