

Croft Farm - Day 4

Orienteering was fun because you got to map read. We found it very difficult because some of the numbers were hidden but easy in some places too!

By Harry

Today we launched rockets. They went really high and far even though they were only made out of a water bottle pumped up with air.

By Tom

Fencing was really fun but hot! We got to practise with our pair first so we had more experience when we did it with the foil (sword.) how to travel around and defend yourself then counter attack.

By Delta

Today was boiling hot! Our instructor Dave was really awesome at explaining what to do rather than just doing for us. He taught us different lots. He made the rocket launch really fun.

By Dani

I liked it when we did the fighting. We actually got to fight against someone and wear the proper kit. Our team was good at the rocket launch as it went really high.

I enjoyed the buggy building even though we lost. I thought it was going to be a nightmare with people shouting, especially the girls, but we worked well as a team and communicated well to make sure everyone was doing a job.

By Toby

All getting dressed up for the disco now...
